

Patterns and figures 1

Figures and patterns decorate the Cathedral in many different places.

1. Draw some sketches that will enable you to make some nice pictures of these decorations when returning to the school.
2. At school you'll have to present your pictures to the class, and in this presentation you'll have to give an account of your thoughts on the making of the pattern e.g. which geometrical figures have been used and if there is any symmetry in the pattern.
